

Oak International offers ...

Quality Replacement Tooling at an Affordable Price

Oak International provides a comprehensive selection of replacement tooling and parts. In accordance with our tradition of excellence, our entire **Signature Tools™** line is designed and manufactured to meet or exceed OEM requirements. **Signature Tools™** brand replacement tooling is available for most coil manufacturing equipment and most HVAC equipment parts.

Signature Tools™ currently available include:

- **Swivel Mandrels** • **Stripper Tubes** • **Mandrel Rods**
- **Pierce Punches** • **Pierce Die Inserts**
- **Expander Bullets** • **Cutters**

In order to provide the best possible product, modern tool-steels and exotic powered metallurgy are used extensively in the manufacture of **Signature Tools™**. The long life of thoroughly engineered **Signature Tools™** replacement parts means machine down-time for tooling and parts replacement can be significantly reduced. **Signature Tools™** also provides a lower-cost alternative when compared to the price of OEM tooling. When used in conjunction with our efficient Oak International Lubricants, **Signature Tools™** replacement parts can reduce overall manufacturing costs even further.

Oak International is dedicated to first-class customer support. Before, during and after every sale, you can count on our customer service representatives to provide your company with the kind of excellent assistance you will come to value.
